Position Type

Academic Internship

Description

This internship focuses on supporting a startup company in the Rady StartR Accelerator program. The internship program concentrates on advanced lean startups and customer development principles. The intern will receive hands on experience focus on the steps and process to develop a new venture. Interns will work with faculty and graduate student teams in developing their business ideas. This hands-on internship covers the techniques and methods to launch a startup.

These objectives will be accomplished through a series attend 5 lecture/discussions; speakers; assigned readings; and working directly with a startup team. During the workshop both in and outside the classroom, you will have a chance to meet and interact with members of the business community involved in entrepreneurial business activities as well as learn about events, incubators and resources. You are expected to be an active participant throughout the workshop.

Interns will submit a report of the experience and hours worked on project.
